## Profit Sharing Plans

While annual personal 401(k) contributions are capped at $\$ 30,500$ for people aged 50 and older (\$23,000 for people under 50), you can save up to \$76,500 in your 401(k) account with profit sharing.

In fact, profit sharing may be the most cost-effective way to increase your company's contribution to your retirement account because you can keep your overall employee obligations low while maximizing contributions to yourself. These contributions are a tax-reducing business expense.

The key is to implement the right kind of profit sharing plan for you and your business. There are four types of profit sharing plans:

New comparability (cross-testing)

Employees receive different amounts based on unique benefit groups.

## $\$ \$$ Pro-rata

All employees get the same percentage of salary determined by the employer each year.

## Integrated

Employees receive different amounts based on their Social Security tax levels.

## 〇〇 Age-weighted

Employees receive different amounts based on their age-older employees receive more.

## NEW COMPARABILITY PROFIT SHARING BENEFITS AND RISKS

## Benefits

- Allows for maximum cost-effective employer contributions into the planup to $\$ 69 \mathrm{~K} / \$ 76.5 \mathrm{~K}$ per year
- Contributions to the plan are flexible and discretionary from year to year
- Contributions are a taxreducing business expense
- A vesting schedule of up to 6 years can be added to Profit Sharing contributions

## Risks

- Can be expensive to make an employer contribution to eligible plan participants

## More on New Comparability

An employer can use what's called "cross-testing" to customize profit sharing. It works by looking at the big picture of an employee's retirement savings and takes into account the projected benefit at retirement. Younger employees and rising stars have room to grow their savings, while owners and senior employees don't, so they can receive more now. In fact, if your company has fewer than ~25 employees per owner, and the owners are generally older than most employees, you might be able to save tens of thousands on your annual tax bill by adding a profit sharing component to your 401(k) plan.

## Profit Sharing Case Study

Consider the chart below. A 50 year old owner doesn't have a profit sharing component in his current 401(k). This means he is limited to saving only $\$ 30,500$ per year toward retirement. By adding a profit sharing component, the owner is able to receive an additional $\$ 46,000$ per year toward retirement from corporate profits. This accelerates the owner's retirement savings, and reduces the annual corporate tax bill by over $\$ 12,420^{2}$ per year.

| Title | Age | Annual Contribution <br> 401(k) Only | Annual Contribution <br> 401 (k) + Profit Sharing |
| :---: | :---: | :---: | :---: |
| Owner | 50 | $\$ 30,500$ | $\$ 76,500^{1}$ |

Increased owner's annual retirement savings by $\$ 46,000$

Reduced corporate tax bill by over $\$ 12,420^{2}$ per year

Tax savings funded about one-quarter of the owner's retirement savings! ${ }^{3}$

Profit Sharing allows the business owner to put away an additional \$46,000 annually toward retirement, and reduces the corporate tax bill by over $\$ 12,420^{2}$. Effectively, the tax savings funds about onequarter of the owner's retirement savings!

And remember, because profit sharing is going into a retirement account, the earnings are tax-deferred for the business owner, and the contributions are tax-reducing for the business.

[^0]
## By the Numbers

## Adding a profit sharing component to the $401(\mathrm{k})$ plan allowed the business owner to save an additional $\$ 46,000$ annually toward retirement, and reduced their corporate tax bill by over $\$ 12,420^{2}$ per year. Effectively the tax savings funded about one-quarter of the owner's retirement savings.

## Key Takeaways

- In order to maximize tax benefits for business owners, the second step is to maximize employer contributions in the 401(k) plan.
- The most efficient way to do this is to add a Profit Sharing component.
- Adding a Profit Sharing component to the $401(\mathrm{k})$ plan allows the business owners to receive the maximum annual $401(k)$ contribution: $\$ 69,000$ per year ( $\$ 76,500$ if over age 50).
- There are many types of Profit Sharing calculations, but under the right circumstances, New Comparability is the most cost-effective for helping owners maximize their plan contributions.
