

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

FI Institutional Quantitative Global Equity Selection Fund (the "Fund") a sub-fund of Fisher Investments Institutional Funds plc (the "Company") B2 Class Shares (unhedged) (IE00BKFHV914)

The Fund is managed by Carne Global Fund Managers (Ireland) Limited (the "Manager"), with Fisher Investments acting as the Fund's investment manager (the "Investment Manager")

OBJECTIVE AND INVESTMENT POLICY

Investment Objective

The investment objective of this actively managed Fund is to outperform the MSCI All Country World Index (the "Benchmark"). There is no guarantee the investment objective will be achieved. The Fund is actively managed by the Investment Manager, meaning that investment decisions are made on a fully discretionary basis. Accordingly, the portfolio holdings may deviate from the Benchmark. This deviation may be material.

Investment Policy

The Fund invests:

- Primarily in equities and equity-related securities within the Benchmark.
- Up to 10% of its total assets in unlisted equities.

Investments in other funds will not be more than 10% of the Fund's total assets. The Fund is actively managed through an optimised combination of quantitative top-down and bottom up models which together capture returns from wide market factors and individual stocks.

The Fund promotes environmental and social characteristics. This includes, but is not limited to, the Investment Manager seeking to have at

least 5% of the Fund's portfolio composed of sustainable investments, and the Investment Manager applying a comprehensive set of exclusionary screens to prevent the Fund from investing in companies that do not meet the Investment Manager's minimum environmental, social and governance criteria.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details, please refer to the Prospectus and Supplement.

Income

Income from the Fund's investments will not be paid out in dividends (except for the distributing D Class Shares, which will distribute income in accordance with the distributing policy set out in the Prospectus).

You can typically sell shares in the Fund on any business day (as set out in the Fund's supplement).

RISK AND REWARD PROFILE

The risk category shows how much the Fund has risen and fallen in the past 5 years, and therefore how much the Fund's returns have varied. It is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. To the extent this share class has no or limited historical data, Benchmark data is used to supplement such historical data. The risk category is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean risk-free.

The Fund is ranked 5 due to its exposure to equity markets, which means the Fund may experience significant volatility.

Currency Risk: The base currency of the Fund is US Dollars. The non-US Dollar share classes of the Fund may be affected unfavourably by fluctuations in currency rates.

Liquidity Risk: Some of the Fund's investments may be difficult to buy or sell. This might affect the price at which the investments can be sold, which would affect the Fund's value.

Counterparty Risk: There is a risk that counterparties to some of the Fund's investments may not perform their obligations and that transactions may not settle.

Emerging Markets Risk: The Fund invests in the emerging markets equities market, which carries a higher than average investment risk and the Fund may have problems or delays in getting its investments back when required.

Quantitative Investing Risk: A quantitative investment style generally involves the significant use of technology to implement a systematic or rules-based approach to selecting investments based on specific measurable factors, which carries the risk of unintended or unrecognized issues or flaws in the design, coding, implementation or maintenance of the technology used in the development and implementation of the quantitative strategy. These issues or flaws may result in the implementation of a portfolio that is different from that which was intended, and could negatively impact investment returns.

ESG Risk: The Fund may be subject to regulatory uncertainty and additional costs in implementing ESG regulations and is reliant on ESG data which may not always be accurate or complete. The Fund might underperform relative to comparable funds that do not incorporate ESG factors or pursue a sustainable investment objective.

Stock Connect Risk: The Fund may trade through the Shanghai and Shenzhen Stock Connect programmes, which introduces regulatory risks that may prevent timely purchases and/or sales of securities and other risks unique to the stock connect programme.

For a more detailed explanation of these and other risks, please refer to the Prospectus and Supplement.

CHARGES

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
