

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### FIE All-Purpose Fund (the "Fund") a sub-fund of Fisher Investments Institutional Funds plc (the "Company") Euro Share Class A (unhedged) (IE00BZ0CPW70)

The Fund is managed by Carne Global Fund Managers (Ireland) Limited (the "Manager"), with Fisher Investments acting as the Fund's investment manager (the "Investment Manager")

## OBJECTIVE AND INVESTMENT POLICY

### Investment Objective

The investment objective of this actively managed Fund is to provide positive total returns in varying market conditions.

While the Fund is actively managed, it is not managed with the intention of outperforming a benchmark. Neither the Fund nor the Investment Manager guarantees any level of return or risk on investments. There is no assurance that the investment objective of the Fund will actually be achieved.

### Investment Policy

The Fund pursues an "all-purpose" strategy whereby it is managed with the aim of taking a flexible level of exposure to capital markets such as equity, bond and currency markets (with the balance of the portfolio in cash and cash-like instruments) depending on the Investment Manager's view of market conditions.

The Fund's investment perspective will operate either: (a) a defensive strategy, based on the Investment Manager's view on current or anticipated market declines, with the aim of preserving value during those market declines; or (b) an investing strategy, based on the Investment Manager's view on current or anticipated market opportunities, with the aim of optimising returns in line with positively performing markets. In each case, the Investment Manager's view will be based on its own proprietary research and investment analysis and discretionary approach to investing.

Periods where the Fund will operate in defensive mode will be where the Investment Manager considers the current or anticipated market (across the various asset classes) to be in decline. In defensive mode, the Fund will focus mainly on both direct and indirect (through derivative

instruments) investments the Investment Manager believes have characteristics to enable them to either (i) maintain value in declining markets (for example, low volatility investments) or (ii) perform positively in declining markets (for example, investments that do not perform in line with market direction). Periods where the Fund will operate in investing mode will be where the Investment Manager considers the current or anticipated market (across the various asset classes) to be performing positively.

In either period, the Fund may invest directly or indirectly (through the use of derivative instruments) in (i) fixed income securities, (ii) cash, cash equivalents and money market instruments (including, but not limited to, cash deposits, commercial paper, certificates of deposit, US Treasury bills and other short term securities, which may be rated or unrated and listed or unlisted), (iii) other collective investment schemes ("CIS"), and (iv) equity and equity-related securities. The Fund may also use derivatives to reduce or protect against other risks, reduce costs, and generate income or capital with appropriate risk. Furthermore, the Fund may use these techniques if controlled by the Fund's risk management process.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details, please refer to the Prospectus and Supplement.

### Income

Income from the Fund's investments will not be paid out in dividends.

You can typically sell shares in the Fund on any business day (as set out in the Fund's supplement).

## RISK AND REWARD PROFILE

The risk category shows how much the Fund would have hypothetically risen and fallen in the past 5 years, and therefore how much the Fund's returns would have varied. Because the Fund has no historical data and has no benchmark, the risk category was calculated using hypothetical historical data based on the current model portfolio for the Fund and may not be a reliable indicator of the Fund's future risk profile. The risk category is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean risk-free.

The Fund is ranked 4 due to its hypothetical exposure to equity markets, which means the Fund may experience significant volatility.

**Currency Risk:** The base currency of the Fund is Euros. The non-Euro share classes of the Fund may be affected unfavourably by fluctuations in currency rates.

**Liquidity Risk:** Some of the Fund's investments may be difficult to buy or sell. This might affect the price at which the investments can be sold, which would affect the Fund's value.

**Counterparty Risk:** There is a risk that counterparties to some of the Fund's investments may not perform their obligations and that transactions may not settle.

**Credit Risk:** There is a risk that any bond investments of the Fund could be defaulted on or downgraded, resulting in a loss.

**Emerging Markets Risk:** The Fund invests in some overseas markets which carry higher than average investment risks and the Fund may have problems or delays in getting its investments back when required.

**Derivatives Risk:** The value of a derivative contract depends primarily on the performance of the underlying asset. A small movement in the value of the underlying asset may cause a large movement in the value of the derivative. Derivatives also involve counterparty risk and the Fund may suffer a loss if a counterparty does not meet its obligations. All exposures arising through investment in derivative instruments will be covered by the underlying assets of the Fund.

**Operational Risk:** Investors should also note that this flexible strategy can translate to higher portfolio turnover than a fund that invests for the long-term irrespective of market conditions. The Fund may thus incur higher transaction costs and suffer more from bid/offer spreads in managing its investments.

**Interest Rate Risk:** When interest rates rise, bond prices tend to fall. This risk is greater the longer the maturity or duration of the bond.

For a more detailed explanation of these and other risks, please refer to the Prospectus and Supplement.

## CHARGES

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	None
