What is this product?

Type:

This product is a sub-fund of an Irish UCITS investment company.

Term:

The Fund is open-ended. This Fund has no fixed investment term or maturity date, but may be terminated in accordance with the terms set out in the Prospectus.

Objectives:

Investment Objective:

The investment objective of this actively managed Fund is to outperform the Russell 2500 Index (the "Benchmark"). There is no guarantee that the investment objective will be achieved. The Fund is actively managed by the Investment Manager, meaning that investment decisions are made on a fully discretionary basis. Accordingly, the portfolio holdings may deviate from the Benchmark. This deviation may be significant.

Investment Policy:

The Fund invests:

- Primarily in equities and equity-related securities of, or linked to, issuers located in the United States.
- Up to 10% of its total assets in unlisted equities.

The Fund may, for liquidity, hedging and/or cash management purposes, in circumstances of extreme volatility or if market factors require and if considered appropriate to the investment objective, invest on a short-term basis in cash, cash equivalents, money market instruments, or government or corporate bonds. Investments in other funds will not be more than 10% of the Fund's total assets.

For full investment objectives and policy details, please refer to the Prospectus and Supplement.

The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see "What are the costs" below).

Income: Income from the Fund's investments will not be paid out in dividends (except for the distributing D, D2, D3, which will distribute income in accordance with the distributing policy set out in the Supplement).

Redemption of Shares: You can typically sell shares in the Fund on any business day (as set out in the Fund's supplement).

Sub-Funds: The Fund is one sub-fund within the Company. This Key Information document is specific only to the Fund. The Prospectus and semi-annual reports are prepared for the entire Company, including all sub-funds. The assets and liabilities of each sub-fund are held separately from the other sub-funds. This means your investment in the Fund will not be affected by claims made against any other sub-fund. The segregation of assets is based on Irish law and these provisions have not been tested in other jurisdictions.

You may exchange shares of one sub-fund for shares in another sub-fund by selling the shares of the first sub-fund and purchasing shares of the other sub-fund as described in the Prospectus.

Share Prices: Share prices for the Fund are published on Bloomberg FISMUSD.

Further Information: More information about the Fund, copies of its Prospectus, Supplement and its latest annual and semi-annual report are available free of charge online at www.fisherinvestments.com/en-gb/ucits and are available in English.

What are the risks and what could I get in return?

Lower risk ← → **Higher risk**

1	2	3	4	**5**	6	7

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in before the recommended holding period and you may get back less. However, your liability will be limited to the amount invested and you will not be liable for any additional financial commitments beyond the amount you have invested.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions will likely impact the value of your investment.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the Fund's Prospectus available at www.fisherinvestments.com/en-gb/ucits.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

What happens if the Manager is unable to pay out?

In the event of the insolvency of the Manager, the Fund’s assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary’s insolvency, or someone acting on its behalf, the Fund may suffer a financial loss and there is no compensation or guarantee scheme in place which may offset, all or any of, this loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is USD 10,000.
